### 1.4 STRIKE Up some fun for Mental Health!

Thursday 22 October, 12pm – 2pm, KingPin Bowling, Canberra Centre

This year for Mental Health Month, the Network is organising a bowling event for consumers. As we are all aware, 2020 has been a challenging and isolating year for many people – more so for mental health consumers, due to COVID-19. It is hoped that this event will help people living with mental illness and those experiencing poor mental health for perhaps the first time, to shrug off the previous 6 months, begin re-engaging with the world and have a bit of fun!

This event will be run in accordance with the public health guidelines. This will mean maintaining the social distancing and hygiene management requirements.

#### IMPORTANT DETAILS

- Participants are required to wear footwear suitable to for a bowling alley as shoe hire will not be available. Footwear such sneakers are ideal.
- Participants are encouraged to wear a face mask. We will have face masks at hand should participants require one.
- Temperature checks will be conducted prior to entry. **Where a temperature is above 37.5 degrees Celsius, entry will be denied.**
- The Network encourages anyone intending to participate to be mindful of their health leading up to the event, particularly if they intend to travel to areas where there are

active cases and/or experience hay fever. If you do have concerns about your health, please consult your GP prior to this event.

- Leading up to this event, registered participants will be contacted to conduct a health check.
- Carers and support persons are welcome to attend and will count towards the maximum number of participants.

**There are limited places available and RSVP's are required. A waiting list will be available. If you are unable to attend after registering please advise the Network as soon as possible.**

**Attendees who have not given an RSVP will not be admitted.**

In the event that the COVID situation changes for the worse in Canberra and this event is deemed too risky to people's health or restrictions are rolled back, the bowling event will be postponed to a safer date and a contingency event will be held online and on the same date and time as originally scheduled.

This event will see participants receive a paint your own craft kit. Participants will all gather together online via Zoom and decorate their items. All materials will be supplied prior to the event.

If you would like to attend our bowling event, please call us on 02 6230 5796 or email to [actmhcncn@actmhcncn.org.au](mailto:actmhcncn@actmhcncn.org.au)

Please leave or include contact details in your RSVP and also indicate whether you are interested in participating in the craft event. Additionally if participants are from the same household, please advise us of this.

## 4. Novel Coronavirus (COVID-19) information

### 4.1 COVID-19 ACT Website

The ACT Health Directorate has a website specific to COVID-19 in the ACT. This website includes Public Health Alerts, prevention guidelines, information on supports and resources etc. as well as information on the current testing criteria. The website can be accessed at the following link <https://www.covid19.act.gov.au>.

Information about COVID-19 is also available 24 hours a day, seven days a week from the national Coronavirus Health Information Line on **1800 020 080**.

### 4.2 COVID-19 Testing Clinics

Canberra Health Services is operating several free testing clinics to make it easier for Canberrans to be tested.

Additionally the GP Respiratory Clinics in the ACT are located in established general practices dedicated to supporting their communities and increasing access to COVID-19 testing. Appointments are required.

A GP Respiratory Clinic is different to a COVID-19 Testing Clinic in that GPs do a full assessment including taking a history, performing an examination, providing testing and treatment. If symptoms are diagnosed as another illness, such as pneumonia, the GP can provide treatment during the appointment, before returning care to the usual GP.

Information about the testing locations can be found via the [ACT COVID-19 website](#).

### 4.3 Update on visitor restrictions for health facilities

From Monday 13 July, all hospitals and community health centres across the ACT are returning to tighter visitor restrictions.

These include:

- one visitor per patient, per day
- children up to the age of 17 years should avoid visiting health facilities
- patients attending an outpatient and/or a community health clinic should, wherever possible, attend alone. If patients do require a support person, they should be asked to limit this to one person only
- admitted babies, children and young people (0 -17 years) may have one parent/carer present at all times, with an additional visitor up to one hour each day
- when a woman is admitted for care related to birthing, she may have up to two support persons present. This needs to be pre-planned with the relevant midwifery and obstetric staff during antenatal care.

These difficult decisions that have been made regarding our health services are to ensure that our most vulnerable Canberrans are safe from COVID-19 and that we continue protect all members of our community.

For more information about changes to ACT Health Services please go to the [ACT COVID-19 website](#).

## 5. Studies and Surveys

### 5.1 Child and Adolescent Mental Health Services (CAMHS): Monash University Study

This Monash University study is investigating perspectives on best practices in Child and Adolescent Mental Health Services (CAMHS) for recognising and responding in circumstances where an attending young person has a parent who is also experiencing a mental health issue.

To do this, they are conducting a qualitative survey of people with relevant life experiences to explore and compare their unique perspectives on CAMHS practices:

- Parents who have had a child attend CAMHS for mental health care whilst they themselves were experiencing a mental health issue
- Young people who have attended CAMHS for mental health care whilst their parent(s) also had a mental health issue
- CAMHS clinicians.

[Follow this link directly to the study](#) or view the attached flyers for more information.

### 5.2 Mindgardens Neuroscience Network – COH-FIT Study

Australians are invited to participate in the world's largest survey of the effects of the COVID-19 pandemic on physical and mental health, to generate new insights that can drive better health policies and investments.

The Collaborative Outcomes Study of Health And Functioning During Infection Times (COH-FIT) has the power to reveal similarities and differences in how people are responding to the pandemic across the globe, and suggest how these may be influenced by age, gender, culture, rate of community transmission, pandemic restrictions, or other factors.

COH-FIT is collecting data about adults and children aged six and older, whose parents or carers can provide a brief rating of their kids as part of their own survey.

[Find more information on the COH-FIT study here](#) and [follow this link to go to straight to the study](#).

The study takes less than 30mins and is anonymous.

### 5.3 National Stigma and Discrimination Reduction Strategy: University of Melbourne Study

The aim of the project is to undertake consultations to inform a national stigma and discrimination reduction strategy with a focus on mental illness that is poorly understood in the community (such as schizophrenia, bipolar disorder, psychosis, and personality disorders).

To ensure that the focus is on mental health conditions other than anxiety and depression, they are inviting people with lived experience (either their own or as a support person) of bipolar disorder, personality disorders, psychosis or schizophrenia to participate. They

welcome participation from people who do not use these terms or identify with these diagnoses.

[Follow this link directly to express your interest in this study](#) or view the attached flyer for more information.
